Education

RWANDA CODING ACADEMY — Nyabihu, Rwanda
Advanced TVET Certificate V, Software Programming and Embedded Systems — 2022 – July 2025

- National examination 2025: 92.7% in ICT and Multimedia, ranked 5th of 1,270 candidates; grade A in 15 of 16 subjects
- Full government scholarship, awarded on Ordinary Level national examination results
- Coursework: Machine Learning with Python, Cyber Security, Data Structures and Algorithms, Applied Mathematics

IBM SKILLSBUILD, online certificates — July – August 2026

- Introduction to Artificial Intelligence; AI Ethics; AI Literacy; Generating Effective Prompts for AI

PETIT SÉMINAIRE SAINT VINCENT DE PAUL, Ndera, Kigali · Ordinary Level — 2019 – 2022

Experience

QT GLOBAL SOFTWARE LTD — Kigali, Rwanda
Full-Stack Developer Intern (paid), ERP Implementation Team — January 2026 – Present

- Build ERPNext (Python) finance, procurement and payroll modules for REMCO, a state-owned group of three companies
- Delivered 37 user stories across 20 work areas, including purchase approvals, three-way invoice matching and tax returns
- Built fraud controls that stop anyone approving their own payment and flag one person at two steps of a transaction
- Moved the paper payroll of 137 employees into the system and reconciled it to the payroll workbook

INNOVATIVE VAS (IVAS) — Kigali, Rwanda
Full-Stack Developer (paid consultant) — December 2025 – Present

- AGRO, an agricultural system for Rwanda and Mozambique: by September 2026, wrote 945 of 976 commits (97%) and merged 324 pull requests across a NestJS backend, React web app and React Native app with mobile-money payments
- REC, the hospital system Rwanda Eye Clinic uses every day: wrote 683 of 895 commits (76%), delivered all 14 items on the clinic's issue tracker, and wrote a deploy script that health-checks each release and rolls back on failure
- Removed build-file malware twice; traced a third attack hidden in commits titled "add repo context for assistants"

Projects & Research

INTAMBWEFIT, training and nutrition platform for Rwandan athletes — 2025
Co-founder; backend developer

- Adapted open-source wger (Django, Flutter, React) and linked a Galaxy Watch app; top-5 finalist, Creators' Garage 2025

INDEPENDENT RESEARCH, rainfall and landslide warning in western Rwanda — 2026
Author, "Evaluating Rainfall Against Seasonal Climatology for Landslide Warning" (unpublished manuscript)

- Compared satellite rainfall with seasonal baselines on historical landslides at equal alert budgets; IMERG Early led in the pooled comparison but not in year-by-year tests after correcting for multiple comparisons

CRYPTAVITA, landslide-warning mobile prototype, team of three — 2024

- Designed the architecture and researched model training; found the model got zero rain because text readings were rejected

OTHER PROJECTS: number-plate reader; Kinyarwanda voice assistant; open-source C++ black-hole simulator, extended

Leadership & Activities

ASIVATE, sound alerts for Deaf and hard-of-hearing users — Kigali, Rwanda
Co-founder; backend and model developer — 2025

- Wrote the Whisper speech server for a watch and phone app that turns sounds and speech into alerts
- Measured how often the speech model missed Rwandan names; built a fix that took "Hirwa" from 0 to 5 of 8 synthetic tests
- 3rd place, Hacking Disability Hackathon 2025; selected presenter, Global HealthTech Summit 2025

RATA INCLUSIVE TECH LAB — Kigali, Rwanda
Python Instructor, school holidays — 2024

- Taught Python to learners who use screen readers; set a blind student's screen reader to announce indentation

Skills & Interests

Technical: Python, TypeScript, Java, C++, SQL; React, React Native, NestJS, Spring Boot, ERPNext; PostgreSQL, Docker

Security: malware clean-up, access control, segregation of duties; learning AI security and prompt injection

Languages: Kinyarwanda (native), English (fluent), French (upper intermediate)

Interests: basketball, swimming, audiobooks, and building things by hand, such as a phone console for the family car
